

Garden Room AV

The Garden Room audiovisual system consists of a big screen TV, a Linux computer, and an Apple TV device. A laptop provided by a presenter may also be used. There is a switch box that is used to select the device to be displayed on the TV.

To turn the system on, use the TV remote control to activate the TV.

Use the push button on the switch box to select the source for the display.

Switch position:

1. **Linux computer:** Turn on the computer if necessary. It will log in automatically. There is a wireless mouse and keyboard.
2. **Apple TV:** The Apple TV will work with iPads, iPhones, and most MacBook computers.
 - a. Make sure your device is connected to the wireless network and that Bluetooth is enabled.
 - b. Select “Biostatistics Garden Room” from the list of AirPlay devices.
 - c. A 4 digit code will appear on the TV. Enter this code on your device.
3. **Device provided by presenter:** Connect the provided device to the switch box using input port 3. There is available a variety of cables and adapters.

Do not disconnect any of the cables. Any device brought in by a presenter can use port #3 on the switch box.

Use the TV remote control to turn the system off.

Please be sure to turn off the TV when you are finished. Contact Dale or one of the IT Team if you have problems.
